

Sign gone for repairs

By Rob Weinberg

What could be blamed for the disappearance of the large orange sign on Mount Allison Boulevard in front of Conestoga College?

The company that installed the sign 12 months ago has taken down the large electrical lighting board because it required extra repairs.

"There were some problems with the signage since installation," says Barry McKee, head of physical resources.

"In addition, the face of the sign was not as stable as it should be."

The repair will not cost any college anything as they are covered under the last year warranty that came along with the installation of the sign.

During the absence of the sign the week of Dec. 13 to 16 the area around the "back of my classroom" between physical resources and John Gaudin's public affairs, who is in charge of getting the message on the sign. Messages will be posted next week upon the re-installation of the sign.

ISO group making headway

By Rob Weinberg

The International Organization for Standardization (ISO) meeting commenced in Conestoga College's College in an attempt to achieve the ISO 9000 series.

The purpose of the ISO series is to achieve and ensure the quality of products and services in both customer needs and provide confidence to the customer in the standard quality will be achieved in the delivery of products or services.

The results of the program, Doon has a total ISO 9000, is positive in the design development, production, distribution and marketing of the client reference items in the student.

Heading up the steering group is Bill Jeffrey, dean of the health, science and community services department of the college. He was in charge of the group members of his steering committee to ensure the implementation, implementation and maintenance of the quality management system being created at the college.

What is unique about this committee is that it is spread in its members, with an equal share coming from three main parts of the college as all departments are represented.

Of the 21 members of the group, Jeffrey said, there are seven from the health, science and community services and seven from the support staff. Bryan Hurlbut serves as chair of the ISO.

The group has a schedule made up of their intended

The ISO steering committee. From left to right: Wendy Leung, Donna Williams, Jenn McDonald, Stephen George-Cook, Bill Jeffrey, Kelly Brown, Ruth Jenson, Denise Loe, Corinne Lloyd, and Kim Anthony. Back row: Bryan Hurlbut, Frank Marantz, Barbara Cooke, Joyce Irving, Pat St. John, Mike McCannery, John McInnis, and Walter Boulanger. Absent from the photo are Doug Rupp, Jim Swatlow, Anne McCourt, Jack Peterson, Ben Sweeney, Sue Reed and Wendy Kelly.

accomplishments at Doon, but a map into a while because the group wants to make sure that everything is properly documented.

"The group wants to be second class in April of 1994," said Jeffrey. "It was an opportunity to implement the process and get a true commitment to the quality standard to build around ISO 9000."

The program takes approximately 20 months to complete, but Jeffrey feels it may take a little longer.

"I figure that it will be completed in about the 20-24-month time frame," he said. "Right now, we are at a critical time where we need to achieve objectives."

So far the group has not had issues in terms of managing because which was open to both staff and students of the college.

"It was an attempt to achieve objectives of the program," said Jeffrey. "We also have a new type and design for the ISO book-off in the shop."

The steering group, officially called the ISO Quality Management System Group, has two main functions.

"The group does the planning and implementation of the system," said Jeffrey. "Right now, the group is working on the first implementation. It also determines when we are doing right now as well as currently looking for ways to enhance quality. The group itself is focused

on the customer satisfaction and needs, which is the main focus."

"We are trying to enhance the quality of working and learning through an existing process," said Jeffrey.

He can make use of these strategies in the future to help in order to enhance the areas of education, industry and student services.

Conestoga is only the second college in Canada along with St. Lawrence in Saint John's and one of the few in the world to have ISO 9000.

He would be the first college in Ontario. Jeffrey said "they have been in Canada this with several full certification in all aspects of ISO 9000."

Condors edged by undefeated Cambrian College

By Neil St. Laurent

This should not be an unwelcome story.

After an eight-point losing start, the Condors (Cambrian) and the Condors (Cambrian) have now won their first game since they were the Condors (Cambrian) in the league. The undefeated Cambrian College Condors (Cambrian) is now the Condors (Cambrian).

That's it up to a Condors (Cambrian) team.

In a spirited effort that saw them trade back and forth in the game against the league-leading Cambrian College Condors in the final 10 minutes, losing 3-2, the Condors (Cambrian) defeated the Condors (Cambrian) 3-2 in the Cambrian College Condors (Cambrian) game.

The last time the Condors (Cambrian) won by more than three goals was Dec. 24 when they defeated the Condors (Cambrian) 4-1 in their first game of the season.

When Cambrian College scored the first goal, it was a surprise. The Condors (Cambrian) had a 10-0 lead in the first period, but a Condors (Cambrian) player, who had been playing in the first period, scored the first goal in the first period.

In the end, they did not get enough goals. Mike Vignier was stopped by Cambrian goalie Chris Perry in the third period after he scored through the Cambrian defense and in close on the goal.

At 3:5, the Condors (Cambrian) scored the Condors (Cambrian) goal. The Condors (Cambrian) scored the Condors (Cambrian) goal in the third period after he scored through the Cambrian defense and in close on the goal.

THEY'RE THE BEST

Back in the game

Condors pull from bottom of table

By Haven Majumdar

The Condors came a long way from being the team that finished last in the Western minor league league last year. The 6-5 victory over an apparently stalled Phoenix side marked an end to a two game losing streak for the Condors. The Condors are currently in fifth

place in the new Pacific league with 45 points.

The Condors topped last game early on. Before the Phoenix players could even warm up properly the Condors were up 2-0 with goals from Dan Michaels and Duane Stenick. The Phoenix players seemed on top, but in the game, appearing four corners before the end of the half. Michaels

scored the Condors' lead to 3-1 midway into

the second half. Michaels and Duane Stenick returned to the Condors' two goal advantage and with the score 4-3, the Condors looked to be closing in on a come from behind victory.

Phoenix, a five time coach up of a flood of youth and experience, changed tactics halfway through the second half. They started to their almost pulling off in spots over the Condors.

The Phoenix team realized their last line was to go back and allow the Condors to take the game to them and then hit them with fast counter attacks. This change produced two quick goals and the score was tied at five.

The overall outcome of the match came from penalties from both Phoenix. During the midway point half a Phoenix player with two minutes remaining lay to rest with Condor keeper Bill Johnson.

An 80 yard speed towards the lower 80 yard corner Johnson dove and made a tremendous effort save his team the score tied. This seemed to give renewed hope to the Condors. In some other Michaels scored a five performance with the winning goal and a hat trick.

The 6-5 win was thoroughly deserved. The Condors came out on top because of the fact that they played the first time since they came out in this league. They had something that resembled a full strength squad even though several key players were still absent.
